This facility notified for the first time in April 1985 under RCRA as a generator of hazardous waste. Upon inspection by staff a landfill was found on-site where approximately thirty drums had been disposed. Currently the landfill is no longer being used. An organization called the Concern Citizens of Noble County complained that the facility was affecting their health, property and overall enjoyment of life. Samples taken from the clarifier on-site and sludge samples revealed lead and cadmium contamination above EP toxic levels. Drums on the landfill have leaked an oily, crusted material.

Staff from the Enforcement Section has issued a Notice of Violation to the facility to cease use of the landfill, to characterize all waste streams and correct other violations. Because enforcement action has been initiated against the facility it is given a low priority for assessment. The landfill will need to be inspected with soil samples and sampling of the leaked material from the drums.

Dear Ms. Pels:

Re: Amcast Industrial
Corporation/Newnam
Manufacturing, Inc.
IND980905418
Noble County

This letter is to update the status of the Amcast Industrial Corporation site in Kendallville, Indiana. Copies of CERCLA file information are enclosed indicating that the site has already been evaluated. According to the memorandum and the letter to U.S. EPA, all drums on site have been removed and drum waste was determined to be nonhazardous. Consequently, this site does not warrant sampling and should be omitted from any lists of potential SSIs (Screening Site Inspections).

I had intended to complete a work plan for this site as it was included on a list of SSI candidates. However, given the actual status, no SSI will be conducted for Amcast Industrial Corp.

Should you have any questions or comments regarding this matter, please contact me at 317/232-8924.

Sincerely,

Michele M. Oertel

Re: Amcast Industrial Corporation/
Newnam Manufacturing, Inc.
200 W. Ohio Street
Kendallville, Indiana 46755
IND 980905418

Dear Mr. Josif:

A site visit was conducted at the Amcast Industrial Corporation facility now known as Newnam Manufacturing, Inc., on August 19, 1988. The name change of the facility took effect in March, 1987.

The purpose of the visit was to tour the facility and obtain additional information for a Site Work Plan to determine whether sampling for hazardous waste on-site would be necessary. The facility was referred to CERCLA after a RCRA inspection (October 3, 1985) revealed leaking drums of an unknown substance in a landfill area on the property. The Enforcement Section, Indiana Department of Environmental Management (IDEM), through a Letter of Violation asked the facility to submit a sampling analysis plan to determine whether the drum waste was hazardous. Test results revealed the waste was nonhazardous. All drums on-site were removed as of September 1987. During the site visit by Site Investigation staff, it was determined that sampling of the landfill area would not be necessary at this time. Let the record reflect the decision that has been made and the name change of the facility. The EPA identification number listed above remains the same.

If you have any questions regarding this matter, please contact me at AC 317/232-8928.

Very truly yours

OFFICE MEMORANDUM

TO: Amcast Industrial Corp./Newnam
Manufacturing, Inc., CERCLA File 3B

FROM: Garry Mills GM
Site Investigation Section

SUBJECT: Site Work Plan Inspection

DATE: September 14, 1988

THRU: Harry E. Atkinson

9/16/88

A site visit was conducted at the Newnam Manufacturing Inc., (formerly Amcast Industrial Corp.) facility on August 19, 1988. The facility was represented by Mr. David Miller, Plant Manager. The purpose of the visit was to see the facility and gain additional information for a Site Work Plan other than from state files, to determine whether sampling for hazardous waste contamination on-site would be necessary. The facility was referred to CERCLA after a RCRA inspection on 10-3-85 revealed leaking drums of a unknown substance in a landfill area of the property. Approximately thirty (30) drums were observed during the inspection. The Enforcement Section, IDEM, through a violation letter asked the facility to submit a sampling analysis plan to determine whether the drum waste was hazardous. Sampling was conducted and completed by a private contractor and submitted to IDEM staff for review and approval. A total of seventeen (17) drums were on-site in which three (3) of them were empty. Test results revealed the drum waste was non-hazardous. The method of disposal for the drums were approved by IDEM staff, and all drums on-site disposed of in September, 1987. During my visit, I was shown the area of the landfill where the drums were stored. I found no evidence that would merit sampling to be conducted by this section. The State recommends no further action at this time.

Compliance Monitoring SectionSUBJECT: Enforcement Follow-up Inspection of
Amcast - Newnam Foundry
Kendallville, Indiana, Noble County
IND 980905418

EPA Region 5 Records Ctr.

287142

On January 29, 1987, Mr. Rod Steele and I conducted an inspection of Amcast-Newnam Foundry for Mr. Robert Malone in regards to the current enforcement action, Cause No. C-001. Amcast-Newnam was represented by Mr. David Miller, facility engineer.

Specifically, we were concerned with an asphalt berm between the sludge roll-off storage building and the outside. Upon inspection, it was found that this berm did exist and is about six to eight inches high. The area both inside of the building and the yard outside appeared free of obvious sludge contamination.

During the inspection, Mr. Miller stated that he did not know when the berm was constructed and that he would get back with me regarding this information. In a subsequent phone call, Mr. Miller stated that the berm was constructed after the inspection conducted in October of 1985 by Mr. Roy Harbert. This finding was reiterated in a letter from Mr. Reece Prather of Amcast Industrial Corporation dated January 29, 1987, referencing the enforcement action.

Pictures of the asphalt berm were taken.

April 3, 1985

U.S. Environmental Protection Agency
RCRA Activities
P.O. Box A3587
Chicago, Illinois 60690

EPA Region 5 Records Ctr.

287143

Gentlemen:

This notification of hazardous waste activity is being submitted to the EPA based on test results of samples taken from the clarifier system at the Newnam Division.

This clarifier is fed water from three wet dust collectors on foundry sand systems and a scrubber system on a gray iron cupola.

Tests taken in 1981 and 1982 showed no problems with lead and cadmium. Recent grab samples taken from this system showed lead levels both above and below the RCRA limits. Since this system operates 24 hours a day, 5 days a week, a 24-hour continuous sample was taken as a representative sample. It is on the basis of this test that this notification is being submitted since it showed high lead and cadmium levels.

Presently, the waste is being contained on site in unused truck docks until a suitable licensed facility can be found to dispose of the waste.

We have been and will continue working with both RMT, Inc. and Pollution Control Systems to determine the cause and possible solutions to alleviate the problem.

OFFICE MEMORANDUM

DATE: October 16, 1985

THRU: Richard A. Strong *RAS*

TO: RCRA File

FROM: Roy E. Harbert *REH*
Compliance Monitoring Section

SUBJECT: Routine RCRA Inspection of
Amcast/Newnam Foundry
Kendallville, Indiana
IND 980905418

Amcast/Newnam Foundry (ANF) just recently notified of activity in the RCRA program (April 1985). No information could be located in the files.

ANF purchased the foundry in 1981 from the Newnam Corporation. Only recently from the solid waste NOV's has ANF started testing all their waste streams. The Solid Waste Management Branch was citing ANF for illegal disposal of solid waste at Reliable Machine and Tool in Kendallville prompting this inspection. No previous RCRA inspection of this facility had been done.

On October 3, 1985, I met with Mr. David Miller, Project Engineer, who accompanied me on the inspection.

ANF is a gray iron foundry producing about 130 tons of castings per day. They have about 230 employees. Cores and bulk castings are made on-site. The cores use phenolic binders but comprise a small amount of the sand and slag generated. The bulk of castings use bentonite for a binder and isocure. Gray iron is smelted from scrap metals in a cupola. Two types of air pollution control systems are used: baghouses and venturi scrubbers. It is the residue from the venturi scrubber system that has been characterized as hazardous. Wastewaters from this system go through a clarifier with the effluent being returned to the system and the sludge going through a filter press. The sludge after dewatering was about 50-70 percent solid and is held in a roll off box for disposal at ILWD.

Mr. Miller stated that to his knowledge no scrubber sludge had been deposited in the landfill west of the plant. This landfill has been used since the plant began production. About 30 drums of unknown materials were deposited on the landfill. An oily crusted material of unknown characteristics had leaked around the drums.

The baghouses residue from wheelabrator and microIpol units have been tested as nonhazardous. ANF is storing the baghouse dusts on their landfill while new analyses are being run. Old analyses indicated those wastes are nonhazardous.

Violations noted were spilled hazardous material around the roll off box, spilled material around abandoned drums on the landfill, lack of personnel training, contingency plan, hazardous waste determination of drums on landfill, lacked arrangements with emergency authorities, and storage violations.

This matter will be referred to the Enforcement Section. A notice of violation is recommended with sampling of drums, landfill, and spilled material on landfill for determination. If materials are hazardous, a complaint with cleanup orders and fine will be needed.

RE: Concerned Citizens of Noble County vs. Amcast Foundry,
Kendallville, Indiana

Dear Nancy:

I represent 100 citizens in Kendallville, Indiana, who are most upset with the air, water and land pollution problems being generated by Amcast Foundry in their town. I have Affidavits from former employees of the Foundry and from the citizens that show this serious situation is worthy of your special attention and which also show Amcast Foundry's near total disregard for the environmental laws of the State of Indiana.

Amcast has recently increased its capacity by nearly 40%, but never got a construction permit from the State of Indiana. I have a petition on file to have them determined a new source, but I would think some intermediary injunctive action should take place if only to let the Foundry know that the State of Indiana intends to protect its citizens from unreasonable pollution and destruction of neighborhoods which virtually destroys long established neighborhood environments.

I attended the settlement conference August 27, 1986, on the State's land complaint regarding hazardous waste generated by the Foundry. You might recall that I stuck my head in your door and said "Hi" and left a hand-written note for you. I was most disappointed that representatives of Air and Water were not present at the hearing. I understand that the State must take one complaint at a time, but I do not feel that an incremental approach to a multi-media problem does justice to the new tough image you are beginning to generate for the Department of Environmental Management.

I certainly understand the reorganization difficulties you must be going through, but I must observe that in some instances it appears like the State's right hand doesn't know what its left hand is doing. This particularly disappointing in the Kendallville case since the State issued a permit for the Foundry to dump its waste into a facility which had recently lost its permit for receiving the waste. Also, I am afraid that if a piecemeal approach is taken to the pollution generated by the Foundry that the overall picture may never be

219/422-3565

accurately depicted. Each violation standing on its own may not appear that severe, but when all of the Amcast violations are added together, the whole will be greater than the sum of the parts. My clients cannot open their windows, the finishes on automobiles from nearby dealers are being destroyed, property values are plummeting, ditches and streams are being polluted, and the Foundry is saving untold amounts by noncompliance with State environmental laws.

I have confidence in your abilities and great hopes that you can bring new muscle to the State of Indiana's environmental policies. I am very interested in working with the State, not against it, and I would be very happy to discuss these matters with you in person at your earliest convenience.

Cordially,

KRUECKEBERG AND SMITH,
Professional Corporation

RE: NOTICE OF CONDUCT, PROGRAMS, OR PRODUCTS WHICH MAY
HAVE THE EFFECT OF SIGNIFICANTLY IMPAIRING,
POLLUTING OR DESTROYING THE ENVIRONMENT

Gentlemen:

In accordance with the duty imposed upon this office by IC 13-6-1-1(a), please be advised that the attached notice pursuant to IC 13-6 has been received by this office. We request that you investigate the allegations contained therein and take appropriate action. Under IC 13-6-1-1(b), if the responsible agency fails to hold a hearing and make a final determination within one hundred eighty (180) days after receipt of this notice, an action may be maintained by the complainant and the agency shall be joined as a party Defendant.

Sincerely,

Linley E. Pearson
Attorney General

NOTICE OF INTENT TO MAINTAIN A COMPLAINT FOR DAMAGES AGAINST
THE NEWNAM FOUNDRY, THE INDIANA DEPARTMENT OF ENVIRONMENTAL MANAGEMENT,
AND THE INDIANA DEPARTMENT OF NATURAL RESOURCES

Dear Sirs:

The Concerned Citizens of Noble County (CCNC), a group of approximately twenty (20) persons, hereby give notice of intent to file a lawsuit pursuant to I.C. 13-6-1-1 against ~~Newnam Foundry, a Division of Amcast~~. By personal observation and consultation with experts and former Newnam employees, the CCNC has reason to believe the Newnam Foundry is violating Federal Clean Air, Clean Water and Solid Waste Acts: 42 USC §4701 et seq., 33 USC §1251 et seq., and 42 USC §6901 et seq. respectively. Such action is necessary to protect the environment of the State of Indiana from air pollution as defined in I.C. 13-7-1-4, from fugitive dust as defined in 325 IAC 6-4-1, and from hazardous waste and open dumping as defined in I.C. 13-7-1-12 and I.C. 13-7-1-16. This letter shall also constitute notice of the CCNC's intent to maintain an action in Federal Court pursuant to 42 USC §7604(b) et seq.

Residents surrounding the Newnam Foundry have had their health, property and enjoyment of life significantly impaired. Residents frequently suffer from throat irritations; those with emphysema or asthma are often house-bound; the paint finishes on cars and houses have been ruined from pollution caused

OAG-E

MAY 23 1986

Notice of Intent
Page Two
May 23, 1986

corrosion, and discolored by thick layers of black soot. Air conditioning must be used to cool homes instead of open windows because dust and soot settles on residents' furniture and carpets; clothes cannot be dried outside; white shoes become black after a simple stroll through the neighborhood; and residents find dead birds in their back yards by their dying bushes. The above unacceptable conditions have led to a severe depreciation in real estate, and the CCNC expect to be compensated for lost real estate and other damages.

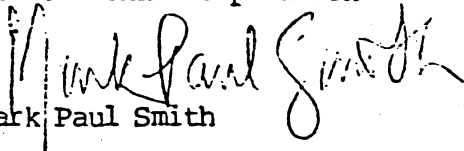

The CCNC have frequently reported these deplorable environmental conditions to the Indiana State Board of Health and other environmental agencies, but no significant action has been taken to halt the air and water pollution being generated by the Foundry. In fact, State officials have even given several days advance notice to the Foundry before their inspections. This has given the Foundry time to "clean up its act" or shut down illegal operations and malfunctioning equipment before the Foundry is inspected.

By practicing extensive violations of the Clean Air, Clean Water and Solid Waste Acts of the United States and of the State of Indiana, the Newnam Foundry has benefited in sums of hundreds of thousands of dollars, but recklessly and severely damaged the lives and property of surrounding residents in similar sums.

Hopefully, this notice will serve to prompt State and Federal environmental professionals to initiate an intensive investigation and analysis of the air, water and soil conditions around the Foundry.

Very truly yours,

KRUECKEBERG AND SMITH,
Professional Corporation

CAUSE NO. (C-001)

COMPLAINT, NOTICE OF OPPORTUNITY FOR ADMINISTRATIVE REVIEW,
AND PROPOSED FINAL ORDER

TO: Mr. Leo W. Ladehoff, President
Amcast Industrial Corporation
4501 Troon Trail
Kettering, OH 45414

Resident Agent for Amcast
Industrial Corporation
c/o CT Corporation
One North Capitol
Indianapolis, Indiana 46204

This is a Complaint, Notice of Opportunity for Administrative Review, and Proposed Final Order under IC 13-7-11 of the Indiana Environmental Management Act and IC 4-22-1, the Indiana Administrative Adjudication Act. The Complainant is the Commissioner of the Indiana Department of Environmental Management (Department). The Respondent is Amcast Industrial Corporation, Newnam Division, a company authorized to do business in Indiana, which operates a place of business at Kendallville, Indiana. Respondent's EPA I.D. number is IND 980905418.

Pursuant to IC 13-7-11 and based on an investigation of the facility conducted on October 3, 1985, by Mr. Roy E. Harbert of the Office of Solid and Hazardous Waste Management (OSHWM), of the Department, and based on the facility's response to a November 26, 1985, Notice of Violation and Request for Information, it has been determined that the Respondent is in violation of the Indiana Hazardous Waste Management Program, IC 13-7-8.5, 320 IAC 4.1, and the Indiana Solid Waste Management Program, 330 IAC 4, IC 36-9-30-35, and IC 13-7-4-1.

Findings

This determination is based on the following Findings:

1. Respondent received analytical results on January 8, 1985, from Pollution Control Systems, Inc., showing EP Toxicity results for lead at 15 milligrams per liter (mg/L). The EP Toxicity limit for lead as a hazardous waste is 5 mg/L. The results were from a sample collected from the Respondent's Schneible (clarifier) tank on November 27, 1984.
2. Respondent received analytical results on April 10, 1985, from Edglo Laboratories, Inc., showing EP Toxicity results for lead at 89 mg/L and cadmium at 1.70 mg/L. The EP Toxicity limit for cadmium as a hazardous waste is 1 mg/L. The results were from a sludge sample collected from the Respondent's facility on March 21, 1985.
3. Respondent notified the U.S. Environmental Protection Agency, Region V (U.S. EPA), on April 3, 1985, of generation of characteristically hazardous waste. The facility notified that it generated characteristic lead D008 and characteristic cadmium D006 at the facility.
4. The Respondent, in answer to our November 26, 1985, Request for Information, explained that the wastewater treatment plant sludge had been disposed of at Reliable Machine and Tool, of Kendallville, Indiana, between 1977 and 1981 and the clarifier sludge was disposed of at the same location from 1981 to March 1985. Reliable Machine and Tool has not notified of hazardous waste activity, does not possess a U.S. EPA identification number, and does not possess interim status or a permit to treat, store, or dispose of hazardous waste. Kendallville Iron and Metal transported the waste to Reliable Machine and Tool during the aforementioned timeframe. Kendallville Iron and Metal has not notified of hazardous waste transportation activity and does not possess a U.S. EPA identification number for same.

5. The Respondent submitted several manifests for shipments of hazardous waste clarifier sludge to ILWD, Inc., of Indianapolis in response to our request for information. The first shipment for which a manifest was received was on April 18, 1985. The waste was manifested as characteristic lead (D008) and cadmium (D006) waste. There were no hazardous waste manifests submitted for shipments of waste by Kendallville Iron and Metal to Reliable Machine and Tool.
6. The Respondent, in answer to our request for information, stated that the clarifier system was installed in 1981.
7. During the October 3, 1985, inspection by Mr. Harbert it was noted that the Respondent was disposing of solid waste (foundry waste) on the west side of the Amcast/Newnam property in an open dump. The Respondent could not identify the contents of several drums which were also disposed of in the on-site open dump.
8. Pursuant to 320 IAC 4-4-1 (40 CFR 262.11) and 320 IAC 4.1-7-2, a generator is required to determine if his waste is hazardous. Based on information gathered by the Department, Respondent is a generator of hazardous waste and did not, until April 3, 1985, determine that the clarifier sludge waste was hazardous. Respondent also did not determine prior to the October 3, 1985, inspection if the abandoned drums on-site or the remaining foundry waste streams are hazardous wastes.
9. Pursuant to IC 13-7-4-1, 330 IAC 4-3-1, and 4-5-1, no person shall cause or allow the construction or operation of a sanitary landfill without valid construction and operation permits issued by the Department (formerly the Environmental Management Board). Based on an investigation by the Department, Respondent has operated a sanitary landfill on the Amcast/Newnam site in Kendallville, Indiana.
10. Pursuant to 320 IAC 4-4-1 (40 CFR 262.12(c)), a generator must not offer his hazardous waste to transporters or to treatment, storage, recovery, or disposal facilities that have not received an EPA identification number. Based on information gathered by the Department, Respondent offered his hazardous waste clarifier sludge to Kendallville Iron and Metal for transportation and to Reliable Machine and Tool for disposal prior to April 1985, neither of which possesses an EPA identification number.
11. Pursuant to IC 13-7-4-1(K) and 320 IAC 4-4-1 (40 CFR 262.20(a)), a generator who transports, or offers for transportation, hazardous waste for off-site treatment, storage, recovery, or disposal, must prepare a manifest. Based on information gathered by the Department, the Respondent did not manifest shipments of hazardous waste clarifier sludge for off-site disposal prior to April 18, 1985.

12. Pursuant to 320 IAC 4-4-1 (40 CFR 262.41), a generator who ships his hazardous waste off-site must prepare and submit annual reports. Based on information gathered by the Department, the Respondent did not submit annual reports as required.
13. Pursuant to 320 IAC 4.1-9-5 referencing 320 IAC 4.1-17-2, facilities must be maintained and operated to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to the air, soil, or surface water which could threaten human health or the environment. Based on information gathered by the Department, the Respondent has released hazardous waste characteristic lead and cadmium clarifier sludge (D006 and D008) on the ground in the area of the clarifier sludge roll-off container.
14. Pursuant to 320 IAC 4.1-9-5(a)(2), containers shall be marked with start of accumulation date. Based on information gathered by the Department, Respondent has not marked the hazardous waste roll-off container with the start of the accumulation date.
15. Pursuant to 320 IAC 4.1-9-5, containers of hazardous waste shall be marked with the words "Hazardous Waste." Based on information gathered by the Department, Respondent has not marked the hazardous waste roll-off container with the words "Hazardous Waste."
16. Pursuant to 320 IAC 4.1-9-5 referencing 320 IAC 4.1-16-7(b), facility personnel shall receive required hazardous waste management personnel training. Based on information gathered by the Department, Respondent did not give required hazardous waste management personnel training prior to the October 3, 1985, inspection date.
17. Pursuant to 320 IAC 4.1-9-5 referencing 320 IAC 4.1-16-7, the owner or operator shall maintain hazardous waste management personnel training records. Based on information gathered by the Department, Respondent has not maintained hazardous waste management personnel training records.
18. Pursuant to 320 IAC 4.1-9-5 referencing 320 IAC 4.1-18, the owner or operator shall develop a contingency plan. Based on information gathered by the Department, Respondent has not developed a contingency plan.
19. Pursuant to 320 IAC 4.1-9-5 referencing 320 IAC 4.1-17-7, the owner or operator shall attempt to make arrangements with appropriate authorities in case of an emergency at the facility. Based on information gathered by the Department, Respondent has not attempted to make arrangements with appropriate authorities in case of an emergency at the facility.

Proposed Final Order

The Complainant hereby informs the Respondent that the following is the Final Order of the Commissioner to take effect thirty (30) calendar days following Respondent's receipt of this Complaint, unless objected to as hereinafter provided:

1. Respondent shall, within thirty (30) days following the effective date of this Order, determine whether or not the waste streams generated at the site are hazardous, including but not limited to all foundry waste streams, the abandoned drums in the on-site disposal area, and any waste that has been disposed of in the on-site disposal area.
2. (a) Respondent shall, within thirty (30) days following the effective date of this Order, in accordance with 320 IAC 4.1-21 and 4.1-28-4, submit a hazardous waste closure/post-closure plan for the on-site disposal area if any wastes in the disposal area are determined to be hazardous. The closure/post-closure plan must be submitted to the Department for approval.

(b) Respondent shall, if applicable, within thirty (30) days of approval of the hazardous waste closure/post-closure plan, implement the hazardous waste closure/post-closure plan as approved and in accordance with the time frames contained therein.

(c) Respondent shall, within thirty (30) days following the effective date of this Order, if the on-site waste disposal area is found to contain no hazardous wastes, submit a solid waste closure/post-closure plan in accordance with 330 IAC 4-5-13(c) and 5-9-5 for the solid waste disposal area to the Department for approval.

(d) Respondent shall, within thirty (30) days of approval of the solid waste closure/post-closure plan, if applicable, implement the solid waste closure/post-closure plan.
3. Respondent shall, immediately upon the effective date of this Order, cease offering characteristic hazardous waste (D006 and D008) clarifier sludge to treatment, storage, recovery, or disposal facilities that do not possess EPA identification numbers.
4. Respondent shall, immediately upon the effective date of this Order, use the hazardous waste manifest system for any shipment of hazardous waste off-site and offer such wastes only to transporters that possess an EPA identification number.

5. Respondent shall, within thirty (30) days following the effective date of this Order, submit generator biennial reports for 1982 through 1983, and 1984 through 1985.
6. (a) Respondent shall, within thirty (30) days following the effective date of this Order, submit an approvable sampling plan for the site to the Department. The purpose of the sampling plan will be to assess contamination of the site and must include, but not be limited to, the hazardous waste roll-off container accumulation area. The plan must clearly define all sampling and analytical protocol, and must address all areas of the site where contamination is possible. The plan must be approved by the Department prior to sampling. The sampling and analysis plan must be in conformance with "Guidelines for Sampling and Analysis Plans," Appendix A, attached.

(b) Within thirty (30) days of approval of the sampling plan by the Department, Respondent shall complete the sampling as approved.

(c) Within sixty (60) days of completion of the sampling, Respondent shall submit an approvable site cleanup plan to the Department. The extent of cleanup necessary shall be based upon the sampling results. This plan must be approved by the Department prior to commencement of cleanup activities.

(d) Within thirty (30) days of approval of site cleanup plan, Respondent shall conduct the cleanup as approved.

(e) Within fifteen (15) days of completion of site cleanup, Respondent shall submit to the Department, certification by an independent Professional Engineer that the cleanup has been completed as outlined in the approved plan.
7. Respondent shall, within five (5) days following the effective date of this Order, mark the start of accumulation date on each hazardous waste container.
8. Respondent shall, within five (5) days following the effective date of this Order, mark or label all hazardous waste containers with the words "Hazardous Waste."
9. Respondent shall, within thirty (30) days following the effective date of this Order, provide a hazardous waste management training program as described in 320 IAC 4.1-16-7 for all personnel involved in hazardous waste management.

10. Respondent shall, within thirty (30) days following the effective date of this Order, document a hazardous waste management training program as described in 320 IAC 4.1-16-7 for all personnel involved in hazardous waste management and submit a copy to the Department for review.
11. Respondent shall, within thirty (30) days following the effective date of this Order, develop a hazardous waste contingency plan and submit a copy to the Department for review. A copy of the plan shall be on file at the site, State, and local emergency organizations.
12. Respondent shall, within thirty (30) days following the effective date of this Order, attempt to make arrangements with appropriate authorities in case of an emergency at the facility.
13. Within thirty (30) days of the effective date of the Commissioner's Final Order, Respondent shall pay to the Environmental Management Special Fund, as a civil penalty for the above violations, the sum of \$20,000. The penalty consists of the following:
 - a. For violation of 320 IAC 4.1-7-2, the sum of \$6,500.
 - b. For violation of 320 IAC 4.1-7-3(c), IC 13-7-4(K), and 320 IAC 4.1-8-1(a), the sum of \$9,500.
 - c. For violation of 320 IAC 4.1-9-5 referencing 320 IAC 4.1-17-2, the sum of \$4,000.
14. In addition to the civil penalty imposed above for violations existing at the time of issuance of this Complaint, the Respondent shall pay an additional civil penalty of \$200 per day for each day of noncompliance with the time limits established pursuant to this Order.

The Complainant recommends that the Respondent begin action immediately to comply with the above Proposed Final Order pending final administrative adjudication of this matter. While such action will not result in mitigation of the civil penalty, as proposed, compliance may prevent the imposition of additional penalties for continued violations.

The Commissioner is authorized to assess civil penalties of up to \$25,000 per day for each violation pursuant to IC 13-7-13-1. Therefore, the civil penalty proposed above, if any, which was based upon the factual circumstances existing prior to issuance of this Complaint, is subject to revision prior to the effective date of this Order, based upon continued violations.

Notice of Opportunity for Administrative Review

The Respondent is hereby notified, pursuant to IC 4-22-1-23, and IC 13-7-11, that the foregoing Proposed Final Order will be effective thirty (30) calendar days following Respondent's receipt of the Complaint as the Final Order of the Commissioner, unless the Respondent files with the Commissioner, prior to the effective date of the Order, a written request for administrative review of the Order by the Solid Waste Management Board (Board).

The request for review shall be in the form of a written answer to the above Findings and/or objections to the imposition of the Order and request that the Board conduct a hearing pursuant to IC 4-22-1 in order to review the Commissioner's Order.

The Respondent's answer or objections should clearly and directly admit, deny, or explain each of the factual allegations set out in the Findings of which it has knowledge. Failure to respond to any factual allegations will be deemed an admission of the truth of the allegation. Said answer or objection should contain:

1. A response to each allegation in the Findings;
2. A definite statement of the facts which constitute the grounds of defense and/or basis for objection; and
3. A request for administrative review by the Board.

All papers and pleadings required to be filed with the Commissioner should be sent to:

Ms. Sue A. Shadley
Chief Legal Counsel
Indiana Department of Environmental Management
105 South Meridian Street
P.O. Box 6015
Indianapolis, IN 46225-6015

Copies of all pleadings or other papers filed with the Commissioner should be served upon all other parties or their attorney, including the Attorney General of Indiana. The Respondent is entitled to be represented by an attorney, to subpoena witnesses, and present testimony on its behalf at any hearing held as a result of this Complaint. Written appearance of counsel should be promptly filed and may be taken into consideration in the granting of additional time to obtain administrative review.

Informal Settlement Conference

Whether or not Respondent requests administrative review pursuant to IC 4-22-1-4, Respondent may confer informally with the Department and a representative of the Attorney General's Office concerning the allegations or requested relief set out in this Complaint. Respondent may request an informal settlement conference at any time by contacting Mr. Robert Malone of the Office of Solid and Hazardous Waste Management at AC 317/232-3409. However, any such request will not affect the thirty (30) calendar day time limit for responding to this Complaint.

Dated at Indianapolis, Indiana, this 25th day of July, 1986.

EPA Region 5 Records Ctr.

287148

Dear Mr. Josif:

A site visit was conducted at the Amcast Industrial Corporation facility now known as Newnam Manufacturing, Inc., on August 19, 1988. The name change of the facility took effect in March, 1987.

The purpose of the visit was to tour the facility and obtain additional information for a Site Work Plan to determine whether sampling for hazardous waste on-site would be necessary. The facility was referred to CERCLA after a RCRA inspection (October 3, 1985) revealed leaking drums of an unknown substance in a landfill area on the property. The Enforcement Section, Indiana Department of Environmental Management (IDEM), through a Letter of Violation asked the facility to submit a sampling analysis plan to determine whether the drum waste was hazardous. Test results revealed the waste was nonhazardous. All drums on-site were removed as of September 1987. During the site visit by Site Investigation staff, it was determined that sampling of the landfill area would not be necessary at this time. Let the record reflect the decision that has been made and the name change of the facility. The EPA identification number listed above remains the same.

If you have any questions regarding this matter, please contact me at AC 317/232-8928.

Very truly yours
